

Single-Engine Aircraft for Commercial Air Transport

Policy Statement 05 | Effective: 19 September 2018

A Background

Several studies and surveys have been conducted on the safety of single engine aircraft operation for commercial air transport in the Maldives. In these surveys, considerations were made to the risks involved in such an operation, the geographical environment of the Maldives and the impacts it could have on the tourism industry.

B Policy Statement

In light of the studies, it is policy of the Maldives Civil Aviation Authority (MCAA) to not allow any commercial Air Transport using Single Engine Aircrafts.

Hussain Jaleel

Chief Executive, Maldives Civil Aviation Authority
