¹ Insertion of associated operator's authorisation number.

² Issuance date of the operations specifications (dd-mm-yyyy).

³ Operator's registered name and the operator's trading name, if different.

⁴ Insert the Commercial Aviation Safety Team (CAST)/ICAO designation of the aircraft make, model and series, or master series, if a series has been designated (e.g., Boeing-737-3K2 or Boeing-777-232). The CAST/ICAO taxonomy is available at <http://www.intlaviationstandards.org/>

⁵ Other type of transportation to be specified (e.g., emergency medical service).

⁶ List the applicable special limitations (e.g., VFR only, day only)

⁷ List in this column the most permissive criteria for each approval or the approval type (with appropriate criteria).

⁸ Insert the approved minimum take-off RVR in metres. One line per approval may be used if different approvals are granted.

⁹ Insert the applicable precision approach category (CAT II, IIIA, IIIB or IIIC). Insert the minimum RVR in metres and decision height in feet. One line is used per listed approach category.

¹⁰ "Not applicable (N/A)" box may be checked only if the aircraft maximum ceiling is below FL 290.

¹¹ Extended range operations (ETOPS) currently apply only to twin-engine aircraft. Therefore the "Not applicable (N/A)" box may be checked if the aircraft model has more than 2 engines.

¹² The threshold distance may also be listed (in NM), as well as the engine type.

¹³ Other authorizations or data can be entered here, using one line (or one multi-line block) per authorization (e.g. special approach authorization, MNPS, approved navigation performance).
